

IntelliCredit

AI-Powered Corporate Credit Appraisal Engine

From weeks to minutes. From guesswork to explainable AI.

1. Data Ingestor

2. Research Agent

3. CAM Engine

THE PROBLEM

India's Corporate Credit — The Data Paradox

3–6

WEEKS to process one loan application

Fragmented Data

GST filings, ITRs, bank statements, PDFs — all siloed and unlinked

Missed Early Warnings

Buried signals in 200-page annual reports go unnoticed until default

Human Bias

Subjective analyst judgement with no audit trail or explainability

No External Intelligence

Litigation, MCA flags & sector news manually googled — or skipped

OUR SOLUTION

IntelliCredit — End-to-End AI Credit Decisioning

01

Data Ingestor

Multi-Format Parsing

- › PDF / XLSX / scanned OCR
- › GST ↔ Bank reconciliation
- › Circular trading detection

02

Research Agent

Digital Credit Manager

- › Web crawl: promoters, sector
- › eCourts + MCA + SFIO
- › Qualitative notes portal

03

CAM Engine

Recommendation & Report

- › Five Cs scoring model
- › SHAP explainability
- › PDF / DOCX CAM output

OUTPUT: Comprehensive Credit Appraisal Memo (CAM) • Loan Amount • Risk-Adjusted Interest Rate • Explainable Decision Logic

Data Ingestor — Multi-Format Intelligence

Annual Reports (PDF)

Key commitments, risk factors, MD&A

GST Returns (3B vs 2A)

Circular trading & inflation detection

Bank Statements

Cash flow patterns & anomaly flags

Legal / DRT Notices

Recovery suits, wilful default flags

MCA Filings

Director history, charge records

Credit Officer notes (site visit, DD) auto-parsed into risk score

GST Reconciliation Engine

GSTR-3B vs GSTR-2A vs Bank Credits

Month	3B (₹L)	2A (₹L)	Bank	Flag
Jan 24	48.2	46.5	47.0	✓ Clear
Feb 24	51.0	49.0	48.0	✓ Clear
Mar 24	89.0	42.0	45.0	⚠ +112%
Jun 24	92.0	41.0	43.0	⚠ +124%

 **AI Finding:** GSTR-3B in Mar & Jun show revenue 112–124% above GSTR-2A purchase data — strong indicator of circular trading / revenue inflation.

Research Agent — The Digital Credit Manager

Economic Times / Moneycontrol

eCourts Portal — Litigation History

MCA21 — Director & Charge Data

SFIO Enforcement Database

ICRA / CRISIL Sector Reports

CIBIL Commercial Reports

Qualitative Portal

Credit officers enter site visit observations → AI adjusts risk score in real-time based on NLP sentiment + key triggers

Sample Findings — Sharma Chemicals Ltd.

HIGH RISK

DRT Mumbai: Recovery suit ₹4.2 Cr (PNB)

eCourts Portal

CAUTION

Promoter named in SFIO probe — related-party txns

Economic Times

POSITIVE

Sector: Specialty chemicals +18% FY26 — ICRA

Business Standard

CAUTION

GST penalty ₹12L for missed Q2 deadline

Moneycontrol

Credit Appraisal Memo & AI Recommendation

Five Cs Scoring

DECISION OUTPUT

CONDITIONAL APPROVAL

Loan Limit:	₹8.5 Crore (vs ₹15 Cr requested · 57% of ask)
Interest Rate:	MCLR + 2.75% (~11.5% p.a.)
Tenor:	36 months
Security:	Factory property (₹38 Cr) + Promoter personal guarantee

SHAP Explainability

Promoter litigation	-18 pts
GST inflation anomaly	-11 pts
Factory utilisation	-8 pts
Collateral coverage	+14 pts
Sector outlook (ICRA)	+9 pts

Approval Conditions

- Quarterly stock audit (bank-appointed)
- Monthly GST reconciliation submission
- Promoter personal guarantee mandatory
- No dividend without bank NOC
- Trigger review if DSCR < 1.20x

PILLAR #3 - CREDIT DECISION ENGINE

Credit Appraisal & Recommendation

Five Cs algorithmic scoring. Scenario Simulation. Explainable AI (XAI) weights. Auto-generated Credit Appraisal Memo ready for credit committee.

COMPOSITE RISK RATING
63 / 100
Risk Band: **MEDIUM-HIGH**

CONDITIONAL APPROVAL
System Limit: **₹5.5 Crore**
Suggested Rate: **MCLR + 275K**
Recommended tenor: **36 months**

EXPLAINABILITY PANEL: FIVE CS FACTOR BREAKDOWN **CLICK FACTORS TO VIEW MODEL WEIGHTS**

- Character: 52** SPD probe on promoter, related-party transactions, late GST compliance. Significant credibility risk.
- Capacity: 71** EBITDA / E2 is adequate but factory at 40% utilization limits near-term upside. Revenue CAGR 12% (3yrs).

UNDER REVIEW

Step 1: Upload & Extract

Drop PDFs, GST files & bank statements → AI extraction with GST reconciliation table showing circular trading flags

Step 2: Research Agent

Watch agent crawl eCourts, MCA, news in real-time → Findings ranked by risk relevance with source attribution

Step 3: CAM & Decision

Five Cs scoring cards + SHAP explainability + full Credit Appraisal Memo downloadable as PDF/DOCX

What the Prototype Can Do — Right Now

Multi-Doc Ingestion

Upload PDFs, XLSX, scanned images. AI extracts structured fields from unstructured documents using LLM+OCR pipeline.

GST Cross-Validation

Automatically reconciles GSTR-3B vs GSTR-2A vs bank credits. Flags revenue inflation anomalies with exact % deviation.

Autonomous Research

AI agent crawls 7 sources in <90 seconds: eCourts, MCA21, SFIO, news, ICRA. All findings ranked by risk relevance.

Qualitative Adjustment

Credit officers input site-visit notes. NLP parses sentiment and re-calibrates the risk score in real-time with full transparency.

Explainable Decisions

SHAP-based factor attribution for every decision. No black box — each point added/deducted is shown with source and reason.

One-Click CAM Output

Claude AI generates a bank-grade Credit Appraisal Memo covering Five Cs. Downloadable as PDF or DOCX in seconds.

Why IntelliCredit Wins

India-First Design

Built specifically for GSTR-2A vs 3B, CIBIL Commercial, DRT recovery, MCA21, and RBI regulatory parsing — not a generic global tool.

Explainable AI, Not a Black Box

Every decision comes with SHAP-based factor attribution. Judges, regulators and borrowers can see exactly why a limit was set.

End-to-End in One Platform

From raw scanned PDFs to a signed-off Credit Appraisal Memo — no human hand-offs, no spreadsheet exports, no tool-switching.

Multi-Source Synthesis

Uniquely cross-links GST data with bank flows, corroborates with eCourts and MCA filings, and validates against live news — all automatically.

Human-in-the-Loop

Credit officers can inject qualitative site-visit notes at any point. The AI recalibrates the risk score transparently around human insight.

CAM-Ready Output

Generates a bank-grade Credit Appraisal Memo (Word/PDF) meeting RBI guidelines — ready to submit to credit committee on Day 1.

Market Opportunity & Deployment Path

₹18.2L Cr

Indian corporate loan book (FY24)

Current average appraisal time

<3 min

IntelliCredit end-to-end time

₹850 Cr+

Annual cost savings potential (est.)

Who Can Use It

- › Public sector banks
- › Private sector banks
- › NBFCs & HFCs
- › Fintech lenders
- › RBI supervisors

Scalability Design

- › Microservices architecture
- › Horizontal scaling on cloud
- › Multi-tenant SaaS model
- › API-first for CBS integration
- › Databricks for big data

India Compliance

- › RBI data localisation ready
- › Compliant with DPDP Act 2023
- › Audit trail for every decision
- › SOC-2 Type II roadmap
- › RBI Regulatory Sandbox eligible

Why IntelliCredit — vs. Manual Process & Existing Tools

Feature	Manual Process	Generic AI Tools	IntelliCredit ✓
Appraisal Time	3–6 weeks	2–3 days	< 3 minutes
India-Specific Data	✗ Partial	✗ Global only	✓ Full (GST/MCA/DRT)
GST Reconciliation	✗ Manual	✗ Not included	✓ Automated + flags
Explainability	✗ Opaque	✗ Black box	✓ SHAP per factor
CAM Output	✓ Manual doc	✗ None	✓ AI-generated PDF/DOCX
Human-in-the-Loop	✓ Always	✗ No portal	✓ Qualitative portal
Web Research	✗ Ad hoc	✗ No	✓ 7-source autonomous
Regulatory Compliance	✓ Banker	✗ Unknown	✓ RBI-aligned design

Roadmap

Phase 1 ✓

Hackathon MVP

3-pillar prototype, React UI, mock data demo

Phase 2

Banking Integration

Live CBS APIs, real GST portal, Finbox/CKYC

Phase 3

Pilot Deployment

NBFC / regional bank pilot — 50 live cases

Phase 4

Scale & Compliance

RBI sandbox, SOC-2 audit, multi-bank rollout
